The Public's
One Account for
Government

Who we are

Login.gov is a federal program within GSA's Technology Transformation Services (TTS). We design and deliver a digital government with and for the American public by partnering with agencies and states.

Our mission is to build a future where every member of the public has seamless and secure access to Government services, and where every agency can focus on *their* mission by reducing costs and complexity.

How it works

Who we serve

100 million
user accounts

500+ million
sign-ins annually

650+
live sites and services

52
agencies and states

As of July 2025

These Government agencies are a few of the many partners who trust Login.gov to provide access to their services.

User Support

- Login.gov is currently available in English, Spanish, French, and Simplified Chinese.
- For users that have technical issues with their Login.gov account, we operate a 24/7 contact center via phone or website contact form. Visit www.login.gov/contact for more information. Support documentation is available at www.login.gov/help.

Login.gov YouTube Channel

Login.gov hosts a YouTube channel with educational videos to assist users in setting up, managing, and securing their accounts. Login.gov YouTube channel link: www.youtube.com/@loggingovgsa

FAQs

What is Login.gov?

Login.gov is a shared technology service within GSA's Technology Transformation Services (TTS) that provides authentication and identity verification capabilities to government agencies. As the public's "one account for government," Login.gov gives the public the opportunity to use a single account to securely access services across participating government websites. Login.gov operates 24/7 support via phone and email. For assistance, visit www.login.gov/help.

How many people use Login.gov?

Login.gov has over 100 million user accounts, and handles 500M+ sign-ins annually for 52 agencies/states and 650+ applications.

What services does Login.gov provide?

As a digital identity provider, Login.gov provides digital identity management as a shared service to government agencies, including:

- An authentication service for securely and seamlessly logging into numerous government services with a single account using an email, password, and Multi-factor authentication (MFA) option
- An identity verification service for easily proving you are who you say you are from the convenience of your own home or on-the-go from your smartphone.

Leadership

Hanna Kim

Login.gov Director

Hanna is the Director of Login.gov, which enables members of the public to create a single digital account that provides access to their benefits and services at over 50 federal and state agencies. She completed both her Bachelor's and Master in Public Affairs degrees at Princeton University, and began her career working as a policy advisor to various senior government officials in the State and Defense Department. Shortly before joining TTS, Hanna was a Principal Product Manager at Amazon, where she held multiple leadership roles, including the Head of Global Trust and Safety.
