LOGIN.GOV

# Press Kit

## The Public's One Account for Government

# Who we are

**Login.gov is a federal program** within GSA's Technology Transformation Services (TTS). We design and deliver a digital government with and for the American public by partnering with agencies and states.

**Our mission** is to build a future where every member of the public has seamless and secure access to Government services, and where every agency can focus on their mission by reducing costs and complexity.

# How it works

**1 Initiate**

User seeks access to a service provider's website

**2 Authenticate**

Creates a secure account with email + MFA

**3 Verify**

Verifies their identity remotely or in-person

**4 Reuse**

Reuses their credential across government

## Multi-factor Authentication (MFA) Methods

| Standard MFA | Phishing Resistant MFA |
|---|---|
| SMS & voice | PIV/CAC |
| One-time code apps | Security key |
| | Face/touch unlock |

Login.gov requires MFA for all accounts. Using both a password and another authentication method increases security by making it difficult for others to access a user's account without a second factor, such as a text message to their phone.

## Identity Verification Methods

| Remote Proofing | In-person Proofing |
|---|---|
| User presents evidence (ID) through their smartphone | User presents evidence at one of the thousands of participating US Postal Service locations |

Login.gov uses a multi-layered, evidence-based identity verification process. Even if a fraudulent actor were to steal a user's state-issued ID, they would still need access to a user's phone or physical mailing address to claim a benefit.

# Who we serve

| 180+ million | 500+ million | 700+ | 54 |
|---|---|---|---|
| user accounts | sign-ins annually | live sites and services | agencies and states |

As of July 2025

**These Government agencies are a few of the many partners who trust Login.gov to provide access to their services.**

# Recent Announcements by Login.gov

**See the following blogs and press releases for more information about Login.gov milestones:**

- Executive Order 14432: Streamlining Access to Government Services Through America.gov (Sept. 29, 2026)
- GSA Applauds OMB Direction to Expand Governmentwide Use of Login.gov (Sept. 1, 2026)
- M-26-18: Scaling Use of Login.gov to Deliver a Universal Sign-on for Public Services (Aug. 31, 2026)
- Login.gov Strengthens Service for the Public and Agency Partners Ahead of 10-year Milestone (Aug. 3, 2026)
- GSA's Login.gov Launches Passport-Based Identity Verification (Aug. 20, 2025)

# What's Next for Login.gov

- Login.gov is currently available in English, Spanish, French, and Simplified Chinese.
- For users that have technical issues with their Login.gov account, we operate a 24/7 contact center via phone or website contact form. Visit www.login.gov/contact for more information. Support documentation is available at www.login.gov/help.

# Login.gov YouTube Channel

Login.gov hosts a YouTube channel with educational videos to assist users in setting up, managing, and securing their accounts. Login.gov YouTube channel link: www.youtube.com/@logingovgsa

# FAQs

## What is Login.gov?

Login.gov is a shared technology service within GSA's Technology Transformation Services (TTS) that provides authentication and identity verification capabilities to government agencies. As the public's "one account for government," Login.gov gives the public the opportunity to use a single account to securely access services across participating government websites. Login.gov operates 24/7 support via phone and email. For assistance, visit www.login.gov/help.

## How many people use Login.gov?

Login.gov has 180+ million user accounts, and handles 500M+ sign-ins annually for 54 agencies/states and 700+ applications.

## What services does Login.gov provide?

As a digital identity provider, Login.gov provides digital identity management as a shared service to government agencies, including:

- An authentication service for securely and seamlessly logging into numerous government services with a single account using an email, password, and MFA option.
- An identity verification service for easily proving you are who you say you are from the convenience of your own home or on-the-go from your smartphone.
